

Vo Van Tu Tai

BUSINESS ANALYST INTERN · PRODUCT & TECHNICAL ANALYSIS · INFORMATION SYSTEMS

Ho Chi Minh City, Vietnam +84 869 500 573 GitHub Portfolio LinkedIn tutaivovan@gmail.com

REQUIREMENTS · BPMN / UML · WIREFRAMES · DATA MODELING · TECHNICAL COLLABORATION

PROFESSIONAL SUMMARY

Information Systems student who combines hands-on operations experience with technical analysis. Translates ambiguous business problems into actors, as-is/to-be workflows, business rules, data models, acceptance-ready requirements, API contracts, dashboards, and reports. Full-stack knowledge helps surface edge cases early and communicate clearly with users, designers, and developers.

BUSINESS ANALYSIS & PRODUCT SKILLS

Requirement Analysis

User stories, use cases, business rules, functional requirements, acceptance criteria fundamentals

Process Modeling

BPMN/UML familiarity, as-is/to-be workflows, actors, status transitions, system boundaries

Data Analysis

ERD, SQL, data relationships, field mapping, dashboard and PDF/Excel reporting requirements

Product & UX

User journeys, MVP scope, prioritization fundamentals, wireframes, user and stakeholder perspectives

BA & Design Tools

Jira for task/backlog tracking; **Figma** for UI flows; **Draw.io** for process, ERD, and system diagrams

Technical Literacy

Postman, OpenAPI, REST APIs, GitHub, web architecture, MySQL/PostgreSQL, PHP/Express

SELECTED ANALYSIS PROJECTS

Requirements · Process & Data Modeling · Product Workflows

Evidence: working applications, process/data models, OpenAPI contracts, and repository documentation

- **Nexus Express · Operations-to-system case: Problem:** shipment status, scan location, tracking, reporting, and COD could be interpreted differently across teams. **Analysis:** mapped the as-is branch flow, actors, exception paths, state transitions, source-of-truth ownership, and event handoffs. **Outcome:** created a consistent requirement and documentation model for five client apps and 13 services, grounded in first-hand J&T operations.
- **Tourist Accommodation Platform · Rule-conflict case: Problem:** customer, provider, and admin journeys shared booking data but required different actions and controls. **Analysis:** separated role-based use cases and defined rules for availability, booking, payment, cancellation, review, moderation, and commission reporting. **Outcome:** translated the model into working screens, dashboards, VNPay/QR pages, and PDF/Excel outputs.
- **Song Tai Shop · Control-gap case: Problem:** customer and admin flows needed clearer authorization and safer destructive operations. **Analysis:** reviewed actors, permissions, checkout/order states, and admin actions; converted gaps into role checks, POST-based deletion, seed data, and local setup requirements. **Outcome:** improved both the functional specification and reviewability of the PHP/MySQL application.

DOMAIN EXPERIENCE

Post Office Operations Staff

Dec 2025 – Mar 2026 · Full-time

J&T Express

- Handled shipment processing, branch logistics, inventory control, exceptions, and daily operational coordination.
- Applied first-hand domain knowledge to validate actors, statuses, scan points, edge cases, and operational scenarios in Nexus Express.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

2022 – Present

Bachelor of Information Systems · GPA: 3.22/4.0 · Expected Graduation 2027

HCMC, Vietnam
