2023 - Present

Business web applications, CRUD workflows, role-based flows, database design, and backend architecture practice

- **Tourist Accommodation Platform:** Built a monolithic Express/EJS/MySQL booking system with customer/provider/admin roles, session-based auth, booking management, VNPay/QR payment flows, and PDF/Excel reports.
- **Business workflow practice:** Implemented CRUD screens, role-based navigation, booking history, provider room management, admin moderation, and database-backed reporting flows.
- **Nexus Express:** Practiced microservice-style architecture through a logistics project with Gateway/BFF, service boundaries, Prisma models, RabbitMQ event exposure, Docker Compose, and public tracking.
- **Cab Booking System:** Explored ride-hailing domain flows such as booking, ride lifecycle, pricing, payment, notification, REST/OpenAPI contracts, Kafka exposure, Redis, and Docker Compose.
- **E-commerce Microservices:** Created a compact Auth/Product/Order practice project with API Gateway, RabbitMQ pub/sub exposure, MongoDB, Docker Compose, JWT auth, and Mocha tests.

OPERATIONS EXPERIENCE

Post Office Operations Specialist

3 Months (Full-time)

J&T Express

- Handled branch logistics, shipment processing, inventory control, and daily operations.
- Converted hands-on shipment workflows into requirements, service boundaries, and operational scenarios for **Nexus Express**.
