

Vo Van Tu Tai

FULL-STACK WEB DEVELOPER INTERN · PHP/MYSQL · BOOTSTRAP · JAVASCRIPT

Ho Chi Minh City, Vietnam GitHub Portfolio Repo LinkedIn tutaivovan@gmail.com

FULL-STACK WEB DEVELOPMENT INTERNSHIP · FRONTEND · BACKEND · DATABASE

PROFESSIONAL SUMMARY

Information Systems student focused on full-stack web development. Built responsive interfaces, PHP/Express backends, MySQL databases, CRUD, authentication, and role-based workflows. Comfortable with Git and Docker Compose; working knowledge of Node.js, Express/EJS, and REST APIs; project exposure to distributed backend concepts. Strongest in connecting business workflows to usable interfaces, backend logic, and relational data.

TECHNICAL SKILLS

Languages

PHP, JavaScript; TypeScript familiarity and Java coursework

Frontend

HTML/CSS, Bootstrap, EJS; React/Vite project familiarity

Backend

PHP/MySQL web apps, CRUD, session auth; Node.js, Express/EJS, and REST API working knowledge

Database

MySQL, SQL, ERD; project exposure to PostgreSQL and MongoDB

DevOps & Tools

Git, GitHub, Postman, Docker Compose; Redis/RabbitMQ/Kafka exposure

Analysis

ERD, database design, BPMN, OpenAPI reading, and API concepts

SELECTED PROJECTS

Selected Projects · Full-stack Applications + Architecture Exploration

Full-stack web practice with PHP/MySQL, Express/EJS/MySQL, Bootstrap, JavaScript, Git, and Docker

- **php-online-store · PHP/MySQL full-stack app**: Developed a shop covering product search and categories, registration/login, cart, checkout, order status, articles, and admin product/order workflows. Later improved authentication, role checks, safer database operations, seed data, Docker Compose setup, screenshots, and local documentation.
- **tourist-accommodation-management-system · Express/EJS/MySQL app**: Developed a booking system with customer, provider, and admin roles. Implemented room CRUD, search and booking flows, session authentication, booking history, moderation dashboards, payment pages, email support, and PDF/Excel reporting.
- **logistics-management-system · Architecture exploration**: Modeled shipment creation, pickup, scan, dispatch, delivery, and public tracking workflows using knowledge from J&T Express operations. Defined Gateway/BFF boundaries and modeled Prisma data, RabbitMQ events, OpenAPI contracts, and Docker Compose flows.
- **cab-booking-system · Architecture exploration**: Modeled customer, driver, booking, ride, pricing, payment, notification, and review domains using REST/OpenAPI contracts, Kafka and Redis concepts, PostgreSQL/MongoDB ownership, and Docker Compose.

OPERATIONS EXPERIENCE

Post Office Operations Staff

Dec 2025 – Mar 2026 · Full-time

J&T Express

- Handled branch logistics, shipment processing, inventory control, and daily operations.
- Applied hands-on shipment knowledge when modeling workflows for **logistics-management-system**.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Bachelor of Information Systems · GPA: 3.22/4.0 · Expected Graduation 2026

2022 – 2026
HCMC, Vietnam
