PROFESSIONAL SUMMARY

Information Systems Engineer (IUH) having completed all degree requirements with a sharp analytical mindset, solid technical foundation, immediate full-time availability, and dual competence across **IT Business Analysis & Project Coordination**. Well-versed in the Software Development Life Cycle (**SDLC, Agile/Scrum**), with hands-on experience in project coordination (Sprint Planning, WBS breakdown, Burndown Tracking, blocker removal), scope management (**Scope Baseline**), and risk mitigation. Skilled in requirements elicitation, authoring engineering-ready specifications (**PRD, SRS, User Stories with Acceptance Criteria**), wireframing (**Figma**), and User Acceptance Testing (**UAT**). Technical edge in **SQL, ERD, API**; excellent negotiation skills, and committed to on-time, high-quality product delivery.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Ho Chi Minh City, Vietnam

Bachelor of Engineering (B.Eng.) in Information

Sep 2022 – 2026 (Completed All Degree Requirements · Available Full-time)

Systems · GPA: 3.26 / 4.0

- **Relevant Technical & Management Coursework:** IT Project Management, Systems Analysis & Design, Database Systems, Software Engineering, Web Application Development, Data Structures & Algorithms, Service-Oriented Architecture (SOA).

WORK EXPERIENCE

HomeNest Software

Ho Chi Minh City, Vietnam

Associate Business Analyst (Promoted from Intern) · PM Assistant

Mar 2026 – Sep 2026

- **FTE Promotion & Sprint Velocity:** Promoted to official Associate BA following impactful internship contributions; partnered with PM in WBS breakdown and Jira Burndown tracking, tactfully balancing workload allocations to sustain velocity without engineer burnout.
- **Scope Negotiation & Conflict Resolution:** Acted as a diplomatic bridge between aggressive stakeholder demands and engineering constraints; negotiated viable technical workarounds to defend Scope Freeze baselines while maintaining high client trust.
- **Engineering Alignment & Edge Cases:** Translated business workflows into testable User Stories (Given-When-Then) with clear data dictionaries; proactively surfaced boundary exceptions early to minimize cross-functional logic friction between Dev and QA.
- **UAT Facilitation & Release Handover:** Established Definition of Done (DoD) and facilitated client UAT sessions; tactfully triaged defect severity (Blocker vs. Deferred) to drive 2+ release cycles to on-time commercial delivery.

J&T Express

Ho Chi Minh City, Vietnam

Operations Process Coordinator (Full-time)

Sep 2025 – Feb 2026

- **Field Collaboration & Process Re-engineering:** Identified warehouse bottleneck patterns; tactfully engaged shift crews to adopt a closed-loop unidirectional sorting flow, cutting staging turnaround by 25% with full frontline team buy-in.
- **SOP Standardization & Dispute Prevention:** Authored standard operating procedures (SOP) categorizing anomalies (misroutes, delivery failures, RTOs); instituted clear yet fair operational boundaries to resolve shift-to-shift disputes and minimize friction.
- **Data Reconciliation & Integrity Control:** Established daily cross-verification routines between physical manifests and system logs; diplomatically resolved driver status mismatches before shift close to protect supply chain data integrity.

SELECTED PROJECTS

Multi-Role Service & Online Booking Transaction Platform [GitHub ↗]

Software Application Project

Concurrency Control, Role-Based Access Control (RBAC), VNPay API, MySQL, Express.js

Oct 2025 – Dec 2025

- **Milestone Management & Concurrency Control:** Planned feature deliveries across sprints; engineered temporary reservation holds (Held/Pending with TTL expiration), preventing duplicate bookings before checkout completion.
- **Role-Based Access Control (RBAC):** Architected a secure permission matrix across 3 stakeholder groups (Customers, Service Hosts, System Admins), guaranteeing privacy and independent partner business data segregation.
- **Payment Gateway Integration & Webhooks:** Specified asynchronous payment flows via **VNPay IPN Webhook** with cryptographic checksum hashing; designed reconciliation fallback logic to guarantee transaction reliability despite browser interruptions.
- **Tiered Cancellation Policy Modeling:** Formulated automated time-bracketed cancellation rules, automatically releasing reserved availability back to the public calendar in real time to optimize partner revenue.

Nexus Express — Logistics Order Management & Workflow Engine (OMS) [GitHub ↗]

Distributed Architecture Project

BPMN 2.0 (Camunda), 3NF Relational Data Modeling, OpenAPI 3.0, PostgreSQL, NestJS, RabbitMQ

Sep 2025 – Feb 2026

- **Shipment Lifecycle Modeling (BPMN 2.0):** Modeled end-to-end parcel state transitions across transit checkpoints using **Camunda BPMN 2.0**, enforcing transition gates triggered by physical barcode scans.
- **Inter-Service API Specifications:** Authored comprehensive **OpenAPI 3.0** contracts for order dispatch and cross-service status sync; incorporated idempotency key mechanisms to prevent duplicate payload processing during network anomalies.

CORE COMPETENCIES & PROJECT MANAGEMENT

Project Management & Coordination: Project Planning & WBS Breakdown, Milestone & Schedule Tracking (Sprint Burndown), Scope & Change Management, Risk Mitigation & Blocker Removal, SLA & Definition of Done (DoD) Management.

BA & Analysis Competencies: Requirements Elicitation, Business & Systems Analysis (BRD, PRD, SRS), User Stories & Acceptance Criteria (Given-When-Then), BPMN 2.0 Process Modeling, Wireframing (Figma), UAT Planning & Execution.

Methodologies & Technical Foundation: Agile, Scrum, Kanban, SDLC; Relational Database Design (ERD 3NF), SQL Queries (MySQL, PostgreSQL), RESTful API Specification (OpenAPI 3.0, Postman), Microservices Concepts.

Tools & Platforms: Jira, Confluence, Trello, Notion, Figma, Camunda Modeler, Draw.io, Postman, Git, GitHub, ClickUp, MS Office Suite.

Languages & Interpersonal Skills: English (Technical documentation, User Story/PRD authoring, professional communication), Vietnamese (Native), Critical Thinking, Scope Negotiation, Cross-Functional Collaboration, Problem Solving.
