SUMMARY

Final-year Information Systems student with practical Business Analyst experience at **HomeNest Software** and hands-on operational & financial reconciliation experience at **J&T Express**. Experienced in designing and modeling multi-role travel booking systems (**Tourist Accommodation Platform**) with dynamic room inventory, concurrency/overbooking prevention, tiered cancellation policies, and **VNPay** gateway integration. Proficient in eliciting requirements, authoring **PRD/SRS**, mapping workflows via **BPMN 2.0 (Camunda)**, writing **User Stories with testable Acceptance Criteria (Given-When-Then)**, and managing product backlogs with PMs. Seeking the **Business Analyst (Fresher)** role at **Bizitrip** to deliver scalable travel & booking solutions and bridge business-engineering communication.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Bachelor of Science in Information Systems · GPA: 3.26 / 4.0

Ho Chi Minh City, Vietnam

Sep 2022 – Present (Exp. 2027)

- **Relevant Coursework:** Systems Analysis & Design, Database Systems, Software Engineering, Web Development, Data Structures & Algorithms, Service-Oriented Architecture.

WORK EXPERIENCE

HomeNest Software

Business Analyst Intern · PM Assistant

Ho Chi Minh City, Vietnam

Jun 2026 – Sep 2026

- **Requirement Elicitation & PRD/SRS Documentation:** Spearheaded discovery workshops with internal teams and external stakeholders; analyzed business pain points, structured Meeting Minutes (MoM), and authored comprehensive PRD/SRS specifications detailing functional workflows and business rules.
- **User Stories & Acceptance Criteria (Gherkin):** Decomposed business needs into prioritized Epics and granular User Stories with testable **Given-When-Then** Acceptance Criteria, ensuring engineering clarity on both "What" to build and "Why".
- **Product Manager Collaboration & Backlog Governance:** Partnered closely with the Product Manager to manage and groom the product backlog in **Notion / Jira**, evaluate sprint release readiness, and conduct sprint demo sessions for business stakeholders.
- **Dev/QA Support & UAT Verification:** Served as the primary liaison for Dev/QA teams to clarify business logic; defined data schemas (ERD/API contracts), authored structured UAT verification matrices, and resolved logic blockers during implementation.
- **User Onboarding & Documentation:** Authored intuitive user manuals and standard operating procedures (SOPs), facilitating interactive onboarding and training sessions for internal operations and client teams.

J&T Express

Logistics Operations Staff (Full-time)

Ho Chi Minh City, Vietnam

Sep 2025 – Feb 2026

- **End-to-End Process Analysis & Bottleneck Elimination:** Mapped and analyzed physical branch workflows handling 300+ daily parcels across intake, dimensional weighing, barcode checkpoints, and courier dispatch, identifying staging bottlenecks to optimize throughput.
- **Exception Flows & Root Cause Analysis (RCA):** Formulated standardized procedures (SOPs) for operational failure modes: package misroutes, transit delays, damaged goods claims, address re-routing, and Return to Origin (RTO).
- **COD Financial Auditing & 3-Way Reconciliation:** Managed daily Cash on Delivery (COD) 3-way financial audits (physical cash collected vs. signed courier receipts vs. digital system ledger) with 100% reconciliation accuracy and zero discrepancy.
- **Domain-to-System Functional Translation:** Transferred operational pain points, scan validation rules, and parcel state machine lifecycles (Pending → In Transit → Out for Delivery → Delivered / RTO) into functional requirements and ERDs for order management software.

SELECTED PROJECTS

Tourist Accommodation Platform — Multi-Role Travel Booking System

Role Permission Matrix (RBAC), Real-Time Booking State Machine, VNPay API, MySQL, Express.js

Course Project

Oct 2025 – Dec 2025

- **Multi-Stakeholder Workflow & RBAC Alignment:** Mapped end-to-end user journeys and resolved conflicting business requirements across 3 stakeholder groups: Guests (search, live availability, booking, payment), Hosts (room inventory, seasonal pricing, payout tracking), and Admins (listing moderation, commission settlement, dispute resolution) via an RBAC matrix.
- **Concurrency Control & Overbooking Prevention:** Designed atomic reservation validation logic and dynamic room availability states (Available, Held/Pending Payment, Booked, Blocked) to eliminate double-booking / race conditions during high-demand booking surges.
- **State Machine & Tiered Cancellation/Refund Rules:** Modeled a resilient booking lifecycle (Pending Payment → Confirmed → Checked-in → Completed / Cancelled) with automated tiered refund rules calculated dynamically against cancellation windows (100% refund > 7 days, 50% 3–7 days, non-refundable < 3 days).
- **Payment Gateway Integration & Order Settlement:** Specified end-to-end integration contracts for **VNPay API** (payment URL generation, asynchronous IPN webhook validation, payment callback verification), handling transaction timeouts and automated invoice generation.

Nexus Express — Logistics & Order Management System (OMS)

BPMN 2.0 (Camunda), Relational Data Modeling (ERD), OpenAPI 3.0 Specs, PostgreSQL, NestJS, RabbitMQ

Academic & Applied Case

Sep 2025 – Feb 2026

- **Order Management & State Lifecycle:** Modeled end-to-end order processing, tracking checkpoints, and dispatch workflows across 12 domain microservices behind an API Gateway, defining event-driven state transitions with idempotency rules to prevent duplicate billing or processing.
- **BPMN 2.0 & API Contract Specifications:** Authored OpenAPI 3.0 specs and detailed Camunda BPMN 2.0 sequence diagrams for cross-service communication (order creation, warehouse fulfillment, courier dispatch, and automated COD settlement).

TECHNICAL SKILLS & LANGUAGES

Analysis & Modeling: Requirement Elicitation, PRD & SRS Authoring, User Stories & Acceptance Criteria (Given-When-Then), BPMN 2.0, Use Cases, UAT Testing, Backlog Prioritization, User Training & Onboarding.

Domain Knowledge: Travel Tech & Booking Platforms (Dynamic Room Inventory, Availability Calendars, Cancellation & Refund Policies, RBAC), Payment Systems (VNPay API, Webhook / IPN Reconciliation), Order Management Systems (OMS, State Machines).

Tools & Platforms: Notion, Jira, ClickUp, Camunda Modeler, Draw.io, Figma, Postman, Git, GitHub, Agile/Scrum.

Data & Architecture: Relational ERD Modeling, SQL Queries (MySQL, PostgreSQL), RESTful API Specs & JSON Payloads (OpenAPI 3.0), Microservices Architecture Concepts.

Languages: English (Professional Working Proficiency), Vietnamese (Native).
