SUMMARY

Final-year Information Systems student with a grounded analytical mindset and solid technical foundation, combining BA internship experience at **HomeNest Software** with hands-on logistics operational problem-solving at **J&T Express**. Strong aptitude in clarifying business requirements, modeling workflows with **BPMN 2.0**, designing data flows, and authoring detailed **PRD/SRS** and testable **User Stories (Given-When-Then)** for engineering teams. Practical exposure to Order Management Systems (OMS), reservation platforms, and digital payment integrations. Proactive, eager to learn, and seeking a **Business Analyst (Fresher)** role to deliver practical value to products and business teams.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Ho Chi Minh City, Vietnam

Bachelor of Science in Information Systems · GPA: 3.26 / 4.0

Sep 2022 – Present (Exp. 2027)

- **Supporting Technical Foundations:** Systems Analysis & Design, Database Systems, Software Engineering, Web Development, Data Structures & Algorithms, Service-Oriented Architecture.

WORK EXPERIENCE

HomeNest Software

Ho Chi Minh City, Vietnam

Business Analyst Intern · PM Assistant

Jun 2026 – Sep 2026

- **Scope Management & Requirement Clarification:** Engaged in stakeholder sessions, utilizing wireframes and process flowcharts to visualize business needs; formalized Meeting Minutes (MoM) and assisted the PM in locking prioritized sprint scopes.
- **Engineering-Ready Specifications:** Translated business needs into structured User Stories using **Given-When-Then**, defining boundary conditions (Edge Cases) and a shared Data Dictionary to align Dev and QA on error handling.
- **Backlog Refinement & Prioritization Support:** Collaborated with the PM to evaluate and prioritize Jira backlog items based on user value and technical feasibility, supporting on-time release milestones.
- **UAT Support & User Onboarding:** Built role-based UAT checklists, verified core workflows prior to release, and authored quick-reference user manuals to facilitate smooth user adoption.

J&T Express

Ho Chi Minh City, Vietnam

Logistics Operations Staff (Full-time)

Sep 2025 – Feb 2026

- **Logistics Flow & Staging Optimization:** Participated in processing and sorting high parcel volumes (>300 parcels/day); proposed rearranging branch staging into a unidirectional flow (Intake → Weighing → Checkpoint Scanning → Route Staging), reducing dispatch congestion.
- **Operational Exception Handling (SOP):** Assisted in drafting standard operating procedures (SOP) classifying delivery failures, misroutes, and return-to-origin (RTO) parcels, clarifying shift-based ownership to prevent parcel backlog.
- **Physical-to-Digital Status Consistency:** Conducted daily cross-checks between signed physical delivery sheets and software logs, quickly identifying and updating delayed statuses to maintain transparent parcel tracking.
- **Ground-Truth Insights for System Design:** Leveraged practical operational friction points and frontline user behaviors to support parcel state modeling and realistic data schemas for order management systems.

SELECTED PROJECTS

Accommodation & Booking Management System — Multi-Role Booking System

Course Project

Role Permission Matrix (RBAC), Reservation Concurrency Control, VNPay API, Express.js, MySQL

Oct 2025 – Dec 2025

- **Reservation Concurrency Control:** Addressed simultaneous booking attempts on single inventory units by designing temporary reservation holds (Held/Pending with TTL timeout) prior to payment confirmation, preventing double-booking.
- **Flexible Cancellation Policy Modeling:** Modeled tiered cancellation timeframes that automatically release room availability back to the public calendar upon booking termination, helping hosts optimize occupancy.
- **Role-Based Access Control (RBAC):** Drafted a strict permission matrix separating Guests, Property Hosts, and Admins, ensuring operational privacy and independent host data management.
- **Payment Gateway Synchronization:** Specified asynchronous integration via **VNPay IPN Webhook** with cryptographic signature verification, ensuring order status updates remain reliable despite user browser drops.

Nexus Express — Logistics & Order Management System (OMS)

Academic & Applied Case

BPMN 2.0 (Camunda), Relational Data Modeling (ERD), OpenAPI 3.0 Specs, PostgreSQL, NestJS, RabbitMQ

Sep 2025 – Feb 2026

- **Parcel Lifecycle Modeling (BPMN 2.0):** Modeled transit checkpoint workflows using **Camunda BPMN 2.0**, enforcing state transitions based on verified physical scan events.
- **Cross-Service API Contracts:** Authored **OpenAPI 3.0** contracts for order generation and status syncing across services, incorporating idempotency keys to prevent duplicate event processing.

TECHNICAL SKILLS & LANGUAGES

BA & Analytical Skills: Requirement Clarification, PRD & SRS Authoring, User Stories (Given-When-Then), BPMN 2.0 Process Modeling, UAT Test Planning, Backlog Prioritization, Exception Flow Modeling.

Domain Exposure: Order Management & Logistics (OMS), Reservation & Booking Services (Inventory calendar, RBAC, cancellations), Digital Payment Integration (Payment flows, Webhook IPN).

Tools & Platforms: Notion, Jira, ClickUp, Camunda Modeler, Draw.io, Figma, Postman, Git, GitHub, Agile/Scrum.

Technical Foundations: Relational ERD Modeling (3NF), SQL Queries (MySQL, PostgreSQL), RESTful API Specs (OpenAPI 3.0), Service-Oriented Concepts.

Languages: English (Professional Working Proficiency), Vietnamese (Native).
