Vo Van Tu Tai

Frontend Software Engineer (React.js · TypeScript · JavaScript ES6+ · UI/UX)

(+84) 869 500 573 • tutaivovan@gmail.com • linkedin.com/in/vovantutai • github.com/VoVanTuTai • tracking.nexus-ex.site

PROFESSIONAL SUMMARY

Information Systems Engineer (IUH, GPA 3.26/4.0 - Distinction) specializing in modern web interface development with **React.js, JavaScript (ES6+), TypeScript, HTML5, and Modern CSS (Responsive Web Design)**. Core engineering strengths: pixel-perfect Figma translation, rendering performance optimization (memoization, lazy loading, debouncing), strict client state management (Context API, custom hooks), and seamless RESTful API & real-time WebSocket integration. Author of the live Single Page Application for a logistics OMS & AI tracking platform running in production at **tracking.nexus-ex.site**. Strong technical English comprehension; adept at AI-assisted development. Available immediately full-time.

CORE TECHNICAL SKILLS

- **Frontend Engineering & Frameworks:** React.js, JavaScript (ES6+), TypeScript, React Hooks, Context API, Single Page Applications (SPA), Client-side Routing, Component-Driven Development, Atomic Design.
- **UI/UX & Modern Styling:** HTML5 Semantic, Modern CSS3, Flexbox, CSS Grid, Responsive Web Design (Mobile-First), CSS Modules, Tailwind CSS, Pixel-Perfect Figma Translation, Web Accessibility (a11y).
- **API Integration & Client State:** RESTful APIs Integration, Axios/Fetch Interceptors, Asynchronous Data Handling, WebSocket/Server-Sent Events (Real-time updates), Optimistic UI Updates, Client-side Caching.
- **Performance, Testing & Tooling:** Vite, Webpack, Chrome DevTools (Lighthouse, Core Web Vitals, Rendering performance), Postman, Git/GitHub, Docker basics, SDLC, Agile/Scrum.
- **AI Tooling & Languages:** Cursor, Claude, ChatGPT, GitHub Copilot (rapid UI prototyping & component testing); Technical English (Reading engineering docs, API specs, and basic communication), Vietnamese (Native).

WORK EXPERIENCE

HomeNest Software
Ho Chi Minh City, Vietnam

Technical Bridge & Frontend Engineer (Technical Bridge · Frontend / BA Assistant)
Mar 2026 – Sep 2026

Project 1: "Life Assistance" — Multi-Service On-Demand Platform & Dynamic Bidding

- **Multi-Service UI Component System Design:** Converted complex Figma wireframes into a reusable UI component library (Atomic Design) for an on-demand ecosystem (Handyman, Ride-Hailing, Carpooling); ensured flawless responsive fidelity across mobile, tablet, and desktop views.
- **Client State Management & Dynamic Bidding UI:** Designed client-side state machine logic for a real-time price negotiation engine; integrated TTL countdown timers, interactive lock modals preventing duplicate clicks, and optimistic UI updates.
- **Client-Side GPS Map Interaction Optimization:** Integrated interactive mapping libraries (Leaflet/Mapbox), implemented debounced pan/zoom events, and optimized driver/customer marker rendering to eliminate frame drops and preserve mobile battery.
- **API Contract Alignment & Mock Testing:** Audited JSON Schemas and OpenAPI 3.0 specs alongside backend engineers; created mock API responses using Postman/MSW to finalize interfaces ahead of live integration, achieving zero data-binding defects.

Project 2: "VietPlus" — Classified Marketplace & Cross-Border Logistics

- **Multi-Step Listing Wizard Development:** Engineered an intuitive multi-step listing wizard with real-time client-side schema validation, live image preview/crop utilities, and client-side image compression prior to server upload.
- **Shipment Tracking Visual Timeline & Dispute UI:** Built an interactive visual timeline illustrating milestone delivery progressions; designed a clear returns & refunds escalation interface with contextual alerts and accessible status badges.
- **Rapid Lead Intake Form Implementation:** Built a streamlined landing intake form for cross-border shipping within 48 hours, integrating client-side telephone and postal validation to safeguard sprint Scope Freeze without backend delays.
- **Cross-Browser Testing & UAT Coordination:** Executed thorough cross-browser testing across Chrome, Safari, Firefox, and mobile webviews; managed defect triage in Jira and partnered with clients during final UAT acceptance sign-off.

WORK EXPERIENCE (CONTINUED)

J&T Express Ho Chi Minh City, Vietnam

Operations Process Coordinator & UX Advocate Sep 2025 – Feb 2026

- **Warehouse Scanning Software UX Optimization:** Shadowed warehouse workers to evaluate workflow ergonomics; introduced hotkey navigation, high-contrast scanning interfaces, and audible confirmation cues, cutting data entry missteps by 25%.
- **Operational Data Visualization:** Formulated SQL queries cross-checking warehouse intake manifests against system logs across high-volume shifts; summarized KPIs in visual dashboard reports for shift supervisors.
- **UI Standard Operating Procedures (SOP):** Authored standard operating procedure documentation for internal software usage; trained newly onboarded staff in accurate system execution to minimize human error.

REPRESENTATIVE TECHNICAL PROJECTS

Nexus Express — Single Page Application (React/TS) & Live AI Tracking Distributed Web Application Project

[Live Demo ↗] [GitHub ↗]

React.js, TypeScript, Tailwind/Modern CSS, Live RAG Chatbot UI, RESTful API, Docker Sep 2025 – Feb 2026

- **Modern SPA Architecture with React & TypeScript:** Engineered the entire client-side interface live in production at tracking.nexus-ex.site; leveraged React.js and strict TypeScript to achieve sub-1.2s page loads and instantaneous route transitions.
- **Real-Time Live RAG Chatbot Interface:** Designed an interactive AI assistant UI featuring text streaming, structured Markdown freight rate comparison tables, and dynamic prompt suggestions, boosting customer engagement by 35%.
- **Visual BPMN Milestone Timeline & Mobile-First:** Transformed complex Camunda BPMN 2.0 parcel lifecycles into an intuitive visual tracking timeline (Intake → Hub Transit → Out for Delivery → Completed) with responsive adaptive styling.
- **Idempotent API Integration & Error Boundaries:** Authored custom React hooks connecting to NestJS services, managing automatic network retry fallbacks and contextual toast feedback for uninterrupted user experience.

Song Tai Shop & Tourist Accommodation — E-Commerce & Booking Web UI [GitHub ↗] Web Application Project

JavaScript (ES6+), HTML5/CSS3, Responsive UI, VNPay Integration, Custom MVC, Docker Oct 2025 – Jan 2026

- **E-Commerce Catalog & Multi-Faceted Filters:** Designed an accessible product catalog and homestay booking interface; optimized client-side filtering across price bands, room categories, and calendar availabilities without full page reloads.
- **Cart Management & Hold TTL Countdown Timer:** Built a responsive client-side shopping cart with a visual 15-minute reservation countdown timer, notifying users prior to inventory expiration to prevent abandoned checkouts.
- **Secure VNPay Payment Redirection Flow:** Engineered a friction-free payment redirect and return-callback UI with VNPay; implemented instant receipt generation and dynamic QR checkout confirmation.

Cab Booking & Real-Time Dispatch System — Real-Time Dispatch UI Interactive Real-Time System Project

[GitHub ↗]

JavaScript (ES6+), Leaflet.js Interactive Map, CSS3 Flexbox/Grid, Responsive Design Dec 2025 – Jan 2026

- **Interactive Real-Time Dispatch Map (Leaflet.js):** Built an interactive mapping interface with Leaflet; rendered pickup/drop-off polyline trajectories and animated real-time vehicle coordinates on map viewports.
- **Trip State-Machine Modals & Reactive Notifications:** Designed dynamic trip status modals (Searching → Matched → Arrived → In-Trip → Completed) complete with smooth CSS micro-interactions and audio feedback.
- **Performance Tuning & Bundle Splitting:** Optimized graphic assets and implemented dynamic module imports, ensuring rapid initial render and smooth 60fps animations even across constrained mobile networks.

EDUCATION & ACADEMIC BACKGROUND

Industrial University of Ho Chi Minh City (IUH) Ho Chi Minh City, Vietnam

Engineer in Information Systems (Completed all degree requirements · Available Full-Time) Sep 2022 – 2026

- **Cumulative GPA: 3.26 / 4.0** (Distinction / Xếp loại Giỏi).
- **Relevant Coursework:** Software Engineering, Object-Oriented Programming (OOP), Data Structures & Algorithms, Systems Analysis & Design (OOAD/UML), Advanced Database Systems & SQL (MySQL, PostgreSQL, Indexing, Transactions), SOA, ERP Systems (Odoo).
